CLASSIC SERIES

LT Lok-Tight Construction

All stands in the KS8000 Series feature Lok-Tight construction, which means that they have the strength of welded construction but also feature the patent-pending bolt system.

A metal sleeve is welded to every Lok-Tight member. This sleeve locks onto the stand which gives Lok-Tight its strength! And, because they lock together, these keyboard stands come unassembled in considerably smaller boxes than welded stands so the cost and storage savings are yours!
