GS8100

61743

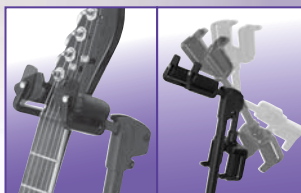

Hang-It™ ProGrip Guitar Stand

The GS8100 is built for the pros! Improved features include an upper flip yoke, which flips forward for use and locks firmly in place. The yoke effortlessly folds back in place, making the stand very compact for travel or storage. Our patent-pending ProGrip™ system holds your guitar in the yoke and keeps it from falling. Steel tubing with oversized walls means enhanced strength and durability gig after gig. The heavy-duty steel tripod base, with Toughened Glass-Reinforced (TGR) nylon leg housing, means this stand is built to last! Stand is height adjustable, allowing the guitar's body to rest against the thickly padded legs.

- Applications:** Single Guitar Stand
- Height Adj.:** 30-43"
- Weight Capacity:** 36 lbs.
- Padding:** Velveteen Rubber
- Construction:** Steel and reinforced nylon leg housing and clutches
- Tubing:** 17mm/ 25mm
- Color:** Black Powder Coat Finish

The improved design of the patent-pending ProGrip™ system not only locks your guitar in place, but also allows for easy one-handed operation. As soon as you lift the guitar up, the gated yoke automatically releases your guitar. Entire yoke flips back for storage when not in use.

GS8200

80689

Hang-It™ ProGrip II Guitar Stand

The GS8200 combines the security and convenience of an auto-locking yoke with the ease of the Hang-It™ design. Simply hang your guitar on the patent-pending yoke and the weight of your guitar draws the spring-loaded yoke arms to pull the gates of the yoke shut, all in one single action! Removal is just as easy; picking up your guitar opens the gates instantly. Improved features include a purple designer cam locking mid-point clutch and reinforced leg housing. Other features include inert rubber padding, reinforced tripod leg braces, and non-slip rubber end caps.

- Applications:** Single Guitar Stand
- Height Adj.:** 30-43"
- Weight Capacity:** 40 lbs.
- Padding:** Inert Rubber
- Construction:** Steel and reinforced nylon leg housing and clutches
- Tubing:** 17mm/ 25mm
- Color:** Black Powder Coat Finish

The design of the patent-pending yoke system not only locks your guitar in place, but also allows for easy one-handed operation. A special-formulated inert rubber lines the upper yoke; it contains no reactive agents or stabilizers, making it the new standard for high-end instrument stands.

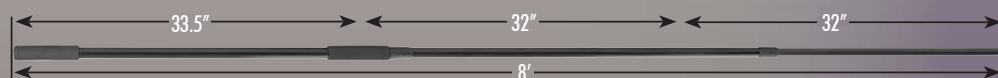

MBP7000

56791

Handheld Mic Boom Pole

Designed for durability and performance, the MBP7000 is a great solution for ENG, EFP and other field recording applications. Our Boom Pole is machined from a sturdy and lightweight aluminum, which allows you to mount your microphone securely and follow your sound source with ease. Three telescopic rods utilize a twist-and-lock system; creating quick, simple and efficient settings extending the length from 3.1-8.1'.

- Weight:** 0.95 lbs.
- Length Adj.:** 3.1-8.1'
- Construction:** All-aluminum;
- EVA Rubber grips
- Color:** Black

CS01

67001

Camera Shoe Adapter

The CS01 allows users to mount any lightweight equipment utilizing a 1/4"-20 mounting socket to a camera shoe. Mount equipment such as audio recording devices, lighting gear, LCD displays or an additional camera. The adapter is designed to mount and tighten to both the camera shoe and the 1/4"-20 socket mount.

- Weight:** 0.95 lbs.
- Weight Capacity:** 3 lbs.
- Threading:** 1/4"
- Construction:** Steel and brass

Adapter fits standard SLR camera shoe mounts to add an audio recording device, lighting gear, LCD display or a additional camera.

Right-Angle Instrument Cable

Adding to our line of Instrument Cables is this 20' Right-Angle Instrument Cable. All Hot Wires cables features quality sound and construction that you can rely on! Our instrument cables have the strength and durability to withstand the road and perform everyday. Cable thickness - 6mm. See pg. 56 for full line of instrument cable.

Genuine Neutrik nickel connectors

Instrument Cables with Neutrik Connectors

Get the most out of your instrument! Our new Instrument Cable series uses the finest components to ensure that every last bit of tone gets from your instrument to your amplifier. Genuine Neutrik connectors feature a one piece machined contact and unique chuck-type strain relief for ultra durability. The conductor itself is comprised of heavy 20awg high strand count 99.99% copper wire, protected by a thick, highly flexible PVC jacket. Tinned copper braided shielding provides a minimum of 98% coverage yet remains flexible and intact over years of winding. Super-Flex technology gives the outer jacket an unmatched combination of durability and flexibility; it lies flat while you're using it and coils easily when you're not.

Microphone Cables with Neutrik Connectors

Quality microphone cables are vital to a clean, reliable audio system. Our new Neutrik XLR cables combine the whisper-quiet performance you'd expect in the studio with the road-approved durability you'd expect on a concert tour. The conductors are comprised of heavy 22awg high strand count 99.99% copper wire twisted pair conductors. Tinned copper braided shielding provides a minimum of 98% coverage and remains flexible and intact over years of winding. Shielding rejects RF and EM interference for the lowest possible noise floor, while maintaining signal accuracy even over long runs. Superior Neutrik connectors provide superb strain relief and additional ground contacts ensure safe cable/chassis grounding, essential when using phantom power. Super-Flex technology gives the outer jacket an unmatched combination of durability and flexibility; it lies flat while you're using it and coils easily when you're not.
